Internship

Beirut, Lebanon

Achievements/Tasks

- Operations & Monitoring.
- Applications & Databases.
- Systems (Windows & Unix).
- Systems (AS/400).
- EFT.

## PERSONAL PROJECTS

WKBeast (09/2021 - Present) [🔗](#)

- Flutter was used to create the WKBeast mobile app which was uploaded on both App Store and Google Play. This app helps with buying and selling cryptocurrency.
- The customer opens the app, fills in the form, either shares his location or selects his location from the dropdown. Upon submission, a notification is sent to the drivers with all the information attached to the payload and whoever accepts this order first gets to deliver it.

## PERSONAL PROJECTS

### Stylish by Hazem (08/2020 - Present)

- Flutter was used to create the "Stylish by Hazem" mobile app which was uploaded on both App Store and Google Play. This app helps organizing appointment scheduling between the barber and his customers.

### Final Year Project (Java) (06/2019 - 12/2019)

- Java was used to create the private red cross mobile app that helps dispatching teams in each branch by sending a notification to every member of this branch. When the team is dispatched, the branch's chief gets to see each member's current location (live location) which helps with splitting the teams for future dispatches.

### Unity Games (01/2018 - 04/2019)

- An RPG game where you have a character, you level him up by killing NPCs. You also get to buy weapons after collecting money from killing NPCs.

### RuneScape Bots (01/2015 - 01/2018)

- Wrote private bots for the famous game "RuneScape" using Java which were sold on multiple platforms.

### Argotta (06/2016 - 12/2016)

- Worked on a Multi-lingual chat mobile application using Java, I select a language, you select a language, we chat, we both receive messages in our respective languages.
